

a**Nominal Swedish forward estimates**

All are single-SNP Wald ratios; none survived FDR

**b****Same-SNP HUNT sensitivity**

Swedish lead SNP, exact label and allele alignment

▲ HUNT ● Swedish

HUNT F=0.002 and 0.180; 0/2 validated.
 Legacy HUNT-selected IVs: $P < 1 \times 10^{-10}$ (23/20 SNPs).
 Exposure scales differ;
 raw beta and MR OR are not directly comparable.

c**Instrument architecture**

194/218 (89%) used one SNP

80% power detectability

Median shown; 218 traits
